

# **Proposal toward Further Progress On the ASEAN + 3 OSRM**

**March 2018**

**Petroleum Refining and Reserve Division  
Ministry of Economy, Trade and Industry  
Japan**

# Outline of the presentation

A work proposal for step forward  
– status report on OSRM –

- I. Background – Our History !
- II. Four Principles in the Initiative
- III. Outreach activities by METI/JOGMEC
- IV. Current Situation & Challenge
- V. Proposal
  1. Proposal by METI
  2. Procedure
  3. Expected Outcome

# I. Background – Our History !

In 2008, Approval of activities for the development of the ASEAN + 3 OSRM

In 2010, Endorsement of Narrative Report

In 2012, Share of Result of Questionnaire

In 2018, ..... (What could we?)

## II. 4 Principles

- **Voluntary and non-binding**
- **Mutual benefits**
- **Mutual respect and respect for bilateral and regional cooperation**
- **Step by step approach with long term perspective**

# III. Outreach Activities by METI/JOGMEC

**METI/JOGMEC take two approaches for outreach activities...**

- > to support for AMS's progress toward your goals**
- > with Japan's stockpiling experience (planning, funding, maintenance ....)**

## 1) Multilateral approach:

### a) OSRM and OSRM workshop

- Our objectives

### b) Capacity Building Program on Energy Security

- Lectures and site visits in Japan
- Sharing experiences and interactive opportunities among AMS participants

## 2) Bilateral approach:

### a) Needs Research

- Tailor made approach, research on specific issue
- Joint work between AMS and METI/JOGMEC

### b) Other ad hoc assistance to individual countries

# IV. Current situation & Challenge

**It looks good, but it would be better ...**

**we should review what have been done and what issues remain on our pathway**

## I. Current situation

- Actively continue to make efforts toward goals
- Made some good progress in each AMS
- Time elapsed, new issues emerged in the course, not an easy path

## II. Challenge

- ◆ Not clear on where we are (in progress, but...)
  - what have been achieved
  - what remain to be solved
  - how issues should be approached and solved
- ◆ Shared enough among AMS members?
- ◆ METI/JOGMEC need to improve/facilitate our outreach activities

# V. Proposal – Proposal by METI

**We would like to propose updates on ...**

**we should review what have been done and what issues remain on our pathway**

**Report**

Narrative Report of the ASEAN+3 OSRM endorsed and adopted in 2010

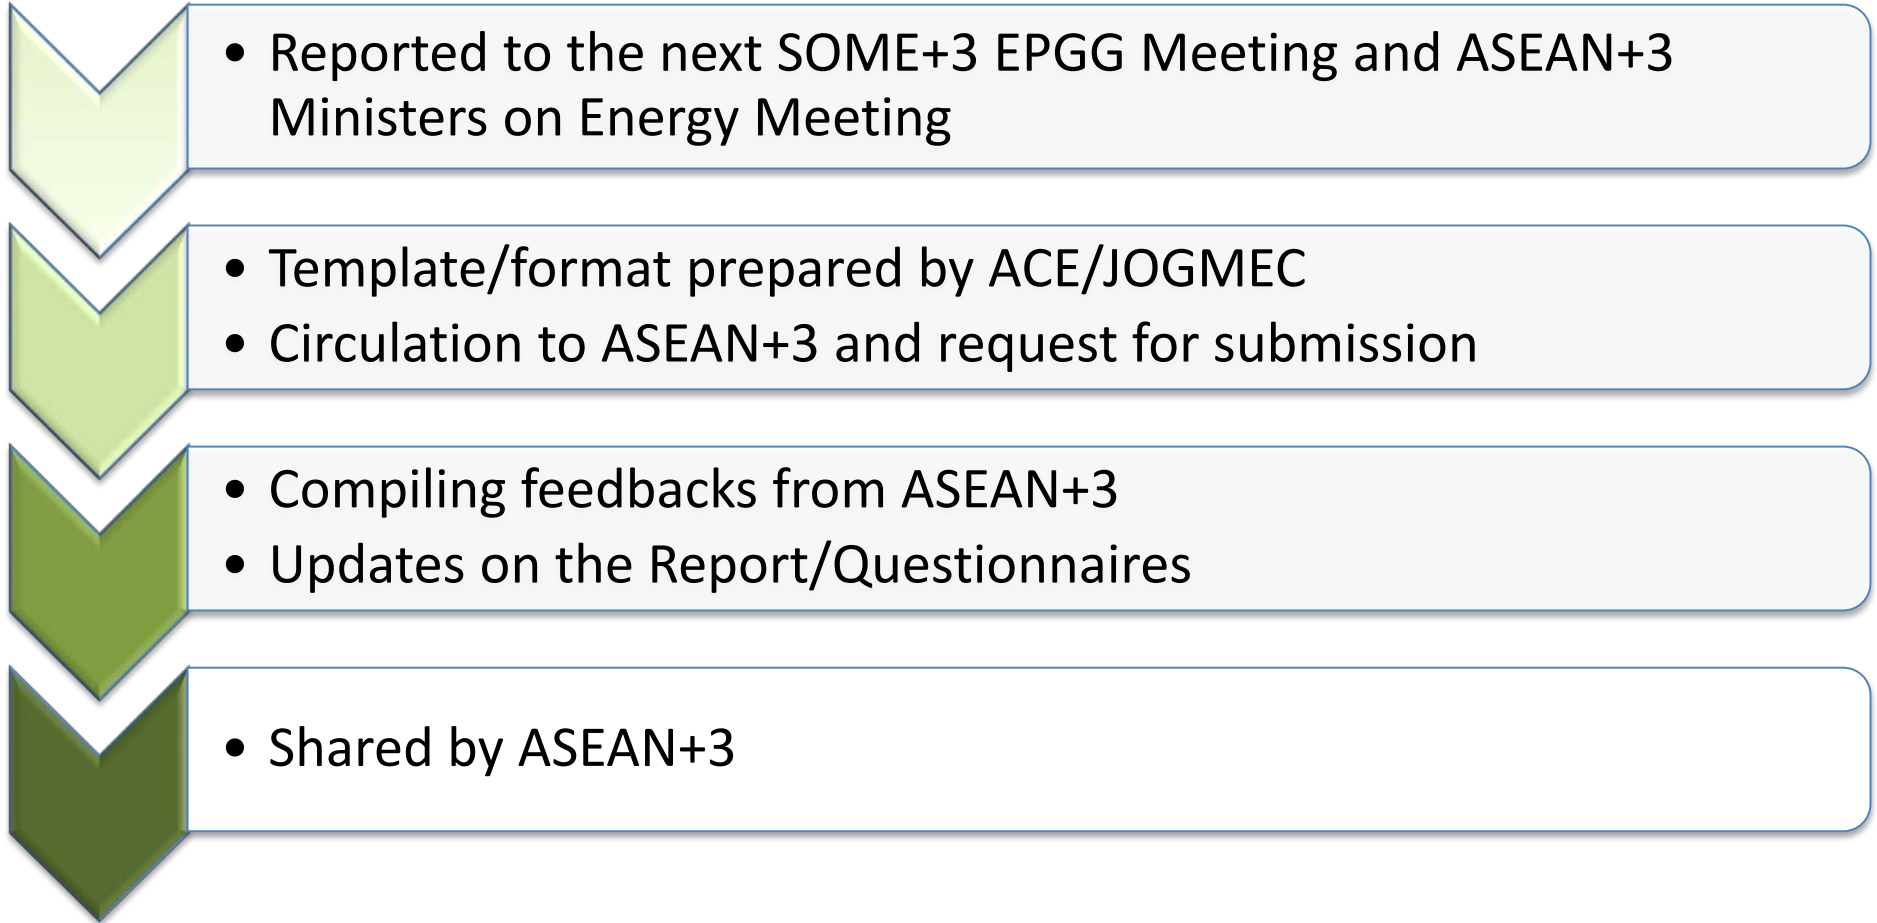

**Base on  
4 Principles**

**Questionnaire**

Questionnaire for Country Needs on the Development of Oil Stockpiling in ASEAN+3 Member Countries as the input for the Proposed Training/Workshop in 2012

# V. Proposal – Procedure

# V. Proposal – Expected Outcome

**Through this process, we are expecting following benefits ...**

- Good opportunities to see ourselves
- Redefine the pathway toward the targets
- Share experiences and challenges among ASEAN + 3
- METI/JOGMEC could provide better outreach activities
- Facilitate the progress to achieve the targets

# Discussion

**Can we agree on for a step forward?**

**Any input/comments welcome  
(schedule, work program, procedure, etc.)**

**Thank you**
